WHY PGA PROFESSIONALS RECOMMEND GFK:

Product Design Feature of Irons

Advantages for Kids

22% lighter than
traditional junior clubs

Easier to swing, keep balance and encourages kids to instinctively hinge and rotate their wrists and arms on the backswing. Traditional junior and kids' clubs are too heavy, causing the kids to sway and lose control, resulting in "the club swinging the kid, rather than the kid swinging the club."

35% larger sweet spot

Traditional junior clubs have smaller clubheads than adult clubs, making it more challenging for kids to strike the ball. Our oversized club heads make it easier to connect with the ball.

Radial profile of sole

More forgiving for variable lie angles. Traditional kids' clubs have a fairly square leading edge. GFK clubs have a radial sole, reducing the resistance at impact to the turf or mat.

High flight grooves

Generates more spin on the ball, increasing its trajectory significantly. Therefore, the ball gets airborne more quickly and flies higher than with traditional kids' clubs.

GFK

Golf Innovations Scotland provides Coaching Packs for PGA professionals, schools, golf clubs and associations. This provides coaching environments with our award-winning clubs to ensure kids are afforded the opportunity to learn golf properly from the very beginning.

GFK

COACHING PACK FOR COACHES

Swedger: x1 Green, x1 Blue

7 Iron: x2 Green, x2 Blue

Left-handed 7 Iron: x1 Green, x1 Blue

GFK+

GFK+ PROGRESSING FROM BEGINNERS TO WINNERS

Providing kids with products that inspire a desire to progress and improve is mission critical as young golfers aspire towards competition golf. Golf Innovations Scotland's engineering team have therefore developed a high performance range of clubs to enable a transition from Beginners to Winners for kids aged 7 to 14.

Designed in 4 stages, the club weight and shaft CPM (flex and torque) increases as the kids grow taller and increase their club head speed.

GFK+ has been tested against all other leading junior clubs and proven to outperform all other brands.
